 northern (*Canis lupus*), 130
 timber, 197-200
 Wolfhound, 131
 Worm, 56, 109, 112, 151

A RARE PHENOMENON OF A BOOK—
bursting with data about animal species and instincts. Translating animal terms into everyday language that brings vividly alive the fascination inherent in the animal kingdom.

A PIONEERING CLASSIC—
that mixes a profound knowledge of animal behavior with rare insight into human actions.

IN THE WORDS OF THE NEW YORK TIMES:

“Konrad Lorenz . . . an extraordinary observer of behavior, writer of irresistible charm, something of a wizard, something of an innocent, something of a guru . . .

“His subjects are those marvelous fellow-creatures of ours, the animals of the nonhuman world. Is it possible to read about them in ethological accounts of their activities without experiencing a shock of recognition, somewhere, in some part of our being? Lorenz’s greylag geese and jackdaws, the cichlid fish who would rather make war than love, the higher primates in the fullness of their bewildering behavioral splendor, have all become firmly established figures in the cultural imagination of our time.”

“A WARM HUMANITY, A KINDLY HUMOR,
AND A DEEP THOUGHTFULNESS SHINE THROUGH
ALMOST EVERY WORD HE WRITES.”

—The New Yorker

“AN ABSORBING AND BEAUTIFUL BOOK.

—N.Y. Herald Tribune
