Third Edition AIR POLLUTION

Edited by ARTHUR C. STERN

Volumes in the ENVIRONMENTAL SCIENCES Series

FROM REVIEWS OF THE SECOND EDITION:

"The American literature—in fact, the whole field of air pollution and its control is indeed fortunate to be in possession of this encyclopedic treatise. Without question, it is the most complete work in existence at this time . . . No worker really interested in air pollution and its control should be without a copy . . ."

—Leonard Greenburg in AMERICAN JOURNAL OF PUBLIC HEALTH

"Amply meets its stated objective, to be the most comprehensive analysis of air pollution available."

—Byron A. Berg in JOURNAL OF OCCUPATIONAL MEDICINE

" . . . will be of great service to all who are concerned with the many aspects and problems of mitigation of air pollution."

—A. Parker in NATURE
